

# Project Bundles for Partners

## *Easily Use Any NetBox Enterprise or NetBox Cloud License in Your Network Projects*

With Project Bundles for Partners, registered NetBox Labs Expert Partners can access any edition and tier of NetBox Enterprise or NetBox Cloud for free during the design and implementation phases of projects for their clients, and seamlessly transition the license to the client at project handoff with standard commercial terms. Deploy quickly and easily, access every advanced feature, and take advantage of support and assistance from the experts at NetBox Labs.

### The Benefits of NetBox in Network Projects

- **Design your client's network with confidence** - Leverage NetBox's comprehensive and cohesive network data model to lay out and validate your network designs, reducing project risk.
- **Accelerate implementation with modern network automation** - Employ NetBox as the network source of truth and automate deployment and configuration - nearly every network automation tool works with NetBox.
- **Deliver operational network automation for your clients** - NetBox is at the center of modern network automation architectures, with a massive integration ecosystem powered by NetBox Labs technology alliances and the community.
- **Living documentation of your project** - Stop handing clients PDFs at project hand-off, and give them NetBox instead, documenting exactly what's been delivered and how it's configured in an operational network source of truth.

#### What is NetBox?

NetBox is the most popular network source of truth for documenting, modeling, and automating networks. NetBox is powered by a massive open source community and is used by tens of thousands of network engineers from growing organizations to Fortune 50 companies.
